

## **Product datasheet for RC200397L2**

## KIF22 (NM\_007317) Human Tagged Lenti ORF Clone

## **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** KIF22 (NM\_007317) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: KIF22

Synonyms: A-328A3.2; KID; KNSL4; OBP; OBP-1; OBP-2; SEMDJL2

Mammalian Cell None

Selection:

Vector:pLenti-C-mGFP (PS100071)E. coli Selection:Chloramphenicol (34 ug/mL)

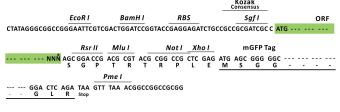

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC200397).

Sequence:

**Restriction Sites:** Sgfl-Rsrll

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

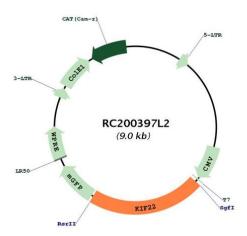

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

## Plasmid Map:

**ACCN:** NM\_007317 **ORF Size:** 1995 bp

OTI Disclaimer: Due to th

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <a href="mailto:custsupport@origene.com">custsupport@origene.com</a> or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** <u>NM 007317.1</u>, <u>NP 015556.1</u>

 RefSeq Size:
 2097 bp

 RefSeq ORF:
 1998 bp

 Locus ID:
 3835

 UniProt ID:
 Q14807

Cytogenetics: 16p11.2

**Domains:** kinesin, HhH1

**Protein Families:** Druggable Genome

MW: 73.1 kDa

**Gene Summary:** The protein encoded by this gene is a member of the kinesin-like protein family. The family

members are microtubule-dependent molecular motors that transport organelles within cells and move chromosomes during cell division. The C-terminal half of this protein has been shown to bind DNA. Studies with the Xenopus homolog suggests its essential role in metaphase chromosome alignment and maintenance. Alternatively spliced transcript

variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jan
