# Product datasheet for RC200579L2

### TMP21 (TMED10) (NM\_006827) Human Tagged Lenti ORF Clone

## **Product data:**

| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | TMP21 (TMED10) (NM_006827) Human Tagged Lenti ORF Clone                                   |
| Tag:                         | mGFP  |
| Symbol:                      | TMP21   |
| Synonyms:                    | p23; P24(DELTA); p24d1; S31l125; S31lll125; Tmp-21-l; TMP21                               |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-mGFP (PS100071)  |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC200579).                            |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              |   |
|                              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf I         ORF         Mlu I            GCG ATC GCC         ATG // NNN         ACG CGT |

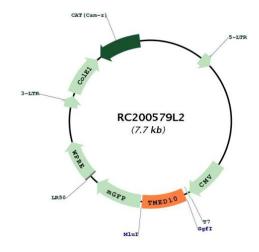

\* The last codon before the Stop codon of the ORF.

#### Plasmid Map:

| ACCN:                  | NM_006827  |
|------------------------|--|
| ORF Size:              | 657 bp   |
| OTI Disclaimer:        | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>                                  |
| OTI Annotation:        | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:            | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method: | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol> |
| RefSeq:                | <u>NM 006827.4</u>   |
| RefSeq Size:           | 4163 bp  |
| RefSeq ORF:            | 660 bp   |

|                  | TMP21 (TMED10) (NM_006827) Human Tagged Lenti ORF Clone – RC200579L2  |
|------------------|---|
| Locus ID:        | 10972   |
| UniProt ID:      | <u>P49755</u>   |
| Cytogenetics:    | 14q24.3   |
| Domains:         | EMP24_GP25L   |
| Protein Families | Transmembrane   |
| MW:              | 25 kDa  |
| Gene Summary:    | This gene is a member of the EMP24/GP25L/p24 family and encodes a protein with a GOLD domain. This type I membrane protein is localized to the plasma membrane and golgi cisternae and is involved in vesicular protein trafficking. The protein is also a member of a heteromeric secretase complex and regulates the complex's gamma-secretase activity without affecting its epsilon-secretase activity. Mutations in this gene have been associated with early-onset familial Alzheimer's disease. This gene has a pseudogene on chromosome 8. [provided by RefSeq, Jul 2008] |
