Citrate transport protein (SLC25A1) (NM_005984) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Citrate transport protein (SLC25A1) (NM_005984) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Citrate transport protein

Synonyms: CMS23; CTP; D2L2AD; SEA; SLC20A3

Mammalian Cell None

Selection:

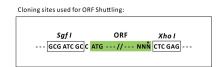

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

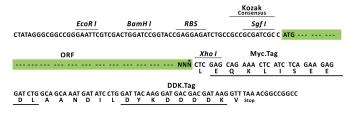

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC200657).

Sequence:

Restriction Sites: Sgfl-Xhol

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_005984

ORF Size: 933 bp

OTI Disclaimer:

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

OTI Annotation:

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: NM 005984.1

 RefSeq Size:
 1619 bp

 RefSeq ORF:
 936 bp

 Locus ID:
 6576

 UniProt ID:
 P53007

 Cytogenetics:
 22q11.21

Domains: mito_carr

Protein Families: Druggable Genome

MW: 34.01 kDa

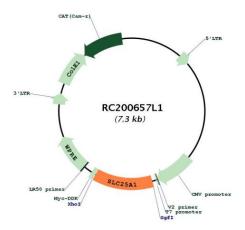

Gene Summary: This gene encodes a member of the mitochondrial carrier subfamily of solute carrier proteins.

Members of this family include nuclear-encoded transporters that translocate small metabolites across the mitochondrial membrane. This protein regulates the movement of citrate across the inner membranes of the mitochondria. Mutations in this gene have been associated with combined D-2- and L-2-hydroxyglutaric aciduria. Pseudogenes of this gene have been identified on chromosomes 7, 11, 16, and 19. Alternative splicing results in

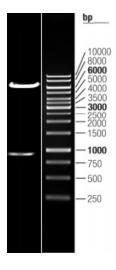

multiple transcript variants. [provided by RefSeq, Dec 2013]
