# Product datasheet for RC200744L4

## Claudin 6 (CLDN6) (NM\_021195) Human Tagged Lenti ORF Clone

### **Product data:**

Product Type:	Expression Plasmids
Product Name:	Claudin 6 (CLDN6) (NM_021195) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	Claudin 6
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC200744).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GC         ATG // NNN         ACG CGT

 $^{\ast}$  The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_021195 660 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	n 6 (CLDN6) (NM_021195) Human Tagged Lenti ORF Clone – RC200744L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 021195.3, NP 067018.1</u>
RefSeq Size:	1389 bp
RefSeq ORF:	663 bp
Locus ID:	9074
UniProt ID:	<u>P56747</u>
Cytogenetics:	16p13.3
Protein Families:	Transmembrane
Protein Pathways:	Cell adhesion molecules (CAMs), Leukocyte transendothelial migration, Tight junction
MW:	23.3 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### Claudin 6 (CLDN6) (NM\_021195) Human Tagged Lenti ORF Clone – RC200744L4

# Gene Summary:Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell<br/>sheets, forming continuous seals around cells and serving as a physical barrier to prevent<br/>solutes and water from passing freely through the paracellular space. These junctions are<br/>comprised of sets of continuous networking strands in the outwardly facing cytoplasmic<br/>leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene<br/>encodes a component of tight junction strands, which is a member of the claudin family. The<br/>protein is an integral membrane protein and is one of the entry cofactors for hepatitis C<br/>virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is<br/>adjacent to another family member CLDN9 on chromosome 16.[provided by RefSeq, Aug<br/>2010]
