Suppressor of Fused (SUFU) (NM_016169) Human Tagged ORF Clone Lentiviral Particle – RC201021L2V	
Protein Pathway	s: Basal cell carcinoma, Hedgehog signaling pathway, Pathways in cancer
MW:	53.9 kDa
Gene Summary:	The Hedgehog signaling pathway plays an important role in early human development. The pathway is a signaling cascade that plays a role in pattern formation and cellular proliferation during development. This gene encodes a negative regulator of the hedgehog signaling pathway. Defects in this gene are a cause of medulloblastoma. Alternative splicing results in multiple transcript variants.[provided by RefSeq, May 2010]
