## Product datasheet for RC201216L2V

## Bak (BAK1) (NM\_001188) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | Bak (BAK1) (NM_001188) Human Tagged ORF Clone Lentiviral Particle   |
| Symbol:                      | Bak   |
| Synonyms:                    | BAK; BAK-LIKE; BCL2L7; CDN1   |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-mGFP (PS100071)  |
| Tag:                         | mGFP  |
| ACCN:                        | NM_001188   |
| ORF Size:                    | 633 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC201216).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 001188.2</u>  |
| RefSeq Size:                 | 2203 bp   |
| RefSeq ORF:                  | 636 bp  |
| Locus ID:                    | 578   |
| UniProt ID:                  | <u>Q16611</u>   |
| Cytogenetics:                | 6p21.31   |
| Domains:                     | Bcl-2   |
| Protein Families:            | Druggable Genome, Stem cell - Pluripotency, Transmembrane   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|               | Bak (BAK1) (NM_001188) Human Tagged ORF Clone Lentiviral Particle – RC201216L2V   |
|---------------|---|
| MW:           | 23.4 kDa  |
| Gene Summary: | The protein encoded by this gene belongs to the BCL2 protein family. BCL2 family members<br>form oligomers or heterodimers and act as anti- or pro-apoptotic regulators that are involved<br>in a wide variety of cellular activities. This protein localizes to mitochondria, and functions to<br>induce apoptosis. It interacts with and accelerates the opening of the mitochondrial voltage-<br>dependent anion channel, which leads to a loss in membrane potential and the release of<br>cytochrome c. This protein also interacts with the tumor suppressor P53 after exposure to<br>cell stress. [provided by RefSeq, Jul 2008] |
