## CoCoA (CALCOCO1) (NM\_020898) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

Product Name: CoCoA (CALCOCO1) (NM\_020898) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: CoCoA

**Synonyms:** calphoglin; Cocoa; PP13275

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC201375).

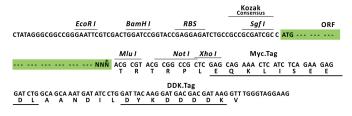

Sequence:

The one insert of this cione is exactly the same as (Nozors/s

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_020898

ORF Size: 2073 bp

#### CoCoA (CALCOCO1) (NM\_020898) Human Tagged Lenti ORF Clone - RC201375L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 020898.1</u>

 RefSeq Size:
 3046 bp

 RefSeq ORF:
 2076 bp

 Locus ID:
 57658

 UniProt ID:
 Q9P1Z2

 Cytogenetics:
 12q13.13

**Protein Families:** Transcription Factors

**MW:** 77.3 kDa

**Gene Summary:** Functions as a coactivator for aryl hydrocarbon and nuclear receptors (NR). Recruited to

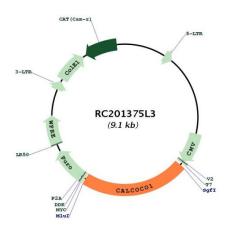

promoters through its contact with the N-terminal basic helix-loop-helix-Per-Arnt-Sim (PAS) domain of transcription factors or coactivators, such as NCOA2. During ER-activation acts synergistically in combination with other NCOA2-binding proteins, such as EP300, CREBBP and CARM1. Involved in the transcriptional activation of target genes in the Wnt/CTNNB1 pathway. Functions as a secondary coactivator in LEF1-mediated transcriptional activation via its interaction with CTNNB1. Coactivator function for nuclear receptors and LEF1/CTNNB1 involves differential utilization of two different activation regions (By similarity). In association with CCAR1 enhances GATA1- and MED1-mediated transcriptional activation from the

gamma-globin promoter during erythroid differentiation of K562 erythroleukemia cells

(PubMed:24245781).[UniProtKB/Swiss-Prot Function]
