	MOBK1B (MOB1A) (NM_018221) Human Tagged ORF Clone Lentiviral Particle – RC201487L2V
MW:	24.9 kDa
Gene Summary:	The protein encoded by this gene is a component of the Hippo signaling pathway, which controls organ size and tumor growth by enhancing apoptosis. Loss of the encoded protein results in cell proliferation and cancer formation. The encoded protein is also involved in the control of microtubule stability during cytokinesis. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Nov 2015]
