Lysosomal acid lipase (LIPA) (NM_000235) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Lysosomal acid lipase (LIPA) (NM_000235) Human Tagged ORF Clone Lentiviral Particle

Symbol: Lysosomal acid lipase

Synonyms: CESD; LAL

Mammalian Cell None

Selection:

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_000235 **ORF Size:** 1197 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC201637).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 000235.2

 RefSeq Size:
 2775 bp

 RefSeq ORF:
 1200 bp

 Locus ID:
 3988

 UniProt ID:
 P38571

 Cytogenetics:
 10q23.31

Domains: abhydrolase, abhydro_lipase

Protein Families: Druggable Genome

Lysosomal acid lipase (LIPA) (NM_000235) Human Tagged ORF Clone Lentiviral Particle – RC201637L2V

Protein Pathways: Lysosome, Steroid biosynthesis

MW: 45.4 kDa

Gene Summary: This gene encodes lipase A, the lysosomal acid lipase (also known as cholesterol ester

hydrolase). This enzyme functions in the lysosome to catalyze the hydrolysis of cholesteryl esters and triglycerides. Mutations in this gene can result in Wolman disease and cholesteryl ester storage disease. Alternatively spliced transcript variants have been found for this gene.
