## Product datasheet for RC201700L1V

## RAD18 (NM\_020165) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | RAD18 (NM_020165) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | RAD18   |
| Synonyms:                    | RNF73   |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-Myc-DDK (PS100064)   |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_020165   |
| ORF Size:                    | 1485 bp   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC201700).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 020165.2, NP 064550.2</u>   |
| RefSeq Size:                 | 5739 bp   |
| RefSeq ORF:                  | 1488 bp   |
| Locus ID:                    | 56852   |
| UniProt ID:                  | <u>Q9N591</u>   |
| Cytogenetics:                | 3p25.3  |
| Domains:                     | RING, SAP, ZnF_Rad18  |
| Protein Families:            | Druggable Genome  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|               | RAD18 (NM_020165) Human Tagged ORF Clone Lentiviral Particle – RC201700L1V  |
|---------------|---|
| MW:           | 56.2 kDa  |
| Gene Summary: | The protein encoded by this gene is highly similar to S. cerevisiae DNA damage repair protein<br>Rad18. Yeast Rad18 functions through its interaction with Rad6, which is an ubiquitin-<br>conjugating enzyme required for post-replication repair of damaged DNA. Similar to its yeast<br>counterpart, this protein is able to interact with the human homolog of yeast Rad6 protein<br>through a conserved ring-finger motif. Mutation of this motif results in defective replication<br>of UV-damaged DNA and hypersensitivity to multiple mutagens. [provided by RefSeq, Jul<br>2008] |
