## Heme oxygenase 2 (HMOX2) (NM\_002134) Human Tagged Lenti ORF Clone

**Product data:** 

**Product Type:** Expression Plasmids

Product Name: Heme oxygenase 2 (HMOX2) (NM\_002134) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: Heme oxygenase 2

Synonyms: HO-2

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

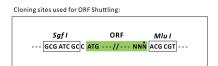

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC201777).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** NM\_002134

ORF Size: 948 bp

### Heme oxygenase 2 (HMOX2) (NM\_002134) Human Tagged Lenti ORF Clone - RC201777L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 002134.2</u>

RefSeq Size: 1754 bp

RefSeq ORF: 951 bp

**Locus ID:** 3163

UniProt ID: P30519

Cytogenetics: 16p13.3

**Domains:** Heme oxygenase

**Protein Families:** Transmembrane

**Protein Pathways:** Porphyrin and chlorophyll metabolism

**MW:** 36 kDa

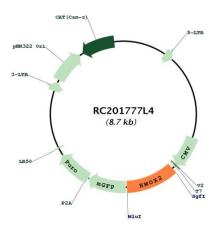

**Gene Summary:** Heme oxygenase, an essential enzyme in heme catabolism, cleaves heme to form biliverdin,

which is subsequently converted to bilirubin by biliverdin reductase, and carbon monoxide, a putative neurotransmitter. Heme oxygenase activity is induced by its substrate heme and by various nonheme substances. Heme oxygenase occurs as 2 isozymes, an inducible heme oxygenase-1 and a constitutive heme oxygenase-2. HMOX1 and HMOX2 belong to the heme oxygenase family. Several alternatively spliced transcript variants encoding three different

isoforms have been found for this gene. [provided by RefSeq, Oct 2013]
