Product datasheet for RC201819L2

Synaptogyrin 2 (SYNGR2) (NM_004710) Human Tagged Lenti ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Synaptogyrin 2 (SYNGR2) (NM_004710) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	Synaptogyrin 2
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC201819).
Restriction Sites:	Sgfl-RsrII
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I ORF Rsr II GCG ATC GCC ATG NNN AGC GGA CCG

 * The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM_004710 672 bp

ORIGENE Synapt	ogyrin 2 (SYNGR2) (NM_004710) Human Tagged Lenti ORF Clone – RC201819L2
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 004710.3</u>
RefSeq Size:	1694 bp
RefSeq ORF:	675 bp
Locus ID:	9144
UniProt ID:	<u>043760</u>
Cytogenetics:	17q25.3
Domains:	Synaptogyrin
Protein Families:	Transmembrane
MW:	24.8 kDa
Gene Summary:	This gene encodes an integral membrane protein containing four transmembrane regions and a C-terminal cytoplasmic tail that is tyrosine phosphorylated. The exact function of this protein is unclear, but studies of a similar rat protein suggest that it may play a role in regulating membrane traffic in non-neuronal cells. The gene belongs to the synaptogyrin gene family. Alternative splicing results in multiple transcript variants. [provided by RefSeq,
