## Asparagine synthetase (ASNS) (NM\_183356) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** Asparagine synthetase (ASNS) (NM\_183356) Human Tagged ORF Clone Lentiviral Particle

**Symbol:** Asparagine synthetase

**Synonyms:** ASNSD; TS11

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

**ACCN:** NM\_183356

ORF Size: 1683 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC201838).

Sequence:

OTI Disclaimer:

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements.

Therefore, OriGona does not guarantee the capability to replicate this plasmid DNA.

Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA.

Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence

verification at a reduced cost. Please contact our customer care team at

custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 183356.1, NP 899199.1

RefSeq Size: 2362 bp RefSeq ORF: 1686 bp

## Asparagine synthetase (ASNS) (NM\_183356) Human Tagged ORF Clone Lentiviral Particle – RC201838L3V

Locus ID: 440

 UniProt ID:
 P08243

 Cytogenetics:
 7q21.3

**Protein Families:** Druggable Genome

**Protein Pathways:** Alanine, aspartate and glutamate metabolism, Metabolic pathways, Nitrogen metabolism

**MW:** 64.4 kDa

**Gene Summary:** The protein encoded by this gene is involved in the synthesis of asparagine. This gene

complements a mutation in the temperature-sensitive hamster mutant ts11, which blocks

progression through the G1 phase of the cell cycle at nonpermissive temperature. Alternatively spliced transcript variants have been described for this gene. [provided by

RefSeq, May 2010]
