

### Product datasheet for RC201904L2

# CLN6 (NM\_017882) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type: Expression Plasmids** 

**Product Name:** CLN6 (NM\_017882) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: CLN6

Synonyms: CLN4A; HsT18960; nclf

**Mammalian Cell** None

Selection:

Vector: pLenti-C-mGFP (PS100071)

E. coli Selection: Chloramphenicol (34 ug/mL)

Sequence:

The ORF insert of this clone is exactly the same as(RC201904). **ORF Nucleotide** 

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

ACCN: NM\_017882

**ORF Size:** 933 bp

#### CLN6 (NM\_017882) Human Tagged Lenti ORF Clone - RC201904L2

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

Q9NWW5

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 017882.1</u>

 RefSeq Size:
 2258 bp

 RefSeq ORF:
 936 bp

 Locus ID:
 54982

Cytogenetics: 15q23

**UniProt ID:** 

**Protein Families:** Transmembrane

**MW:** 35.9 kDa

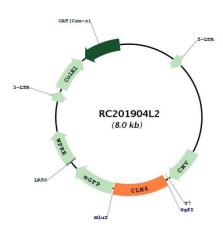

**Gene Summary:** This gene is one of eight which have been associated with neuronal ceroid lipofuscinoses

(NCL). Also referred to as Batten disease, NCL comprises a class of autosomal recessive, neurodegenerative disorders affecting children. The genes responsible likely encode proteins involved in the degradation of post-translationally modified proteins in lysosomes. The primary defect in NCL disorders is thought to be associated with lysosomal storage function.
