

Product datasheet for RC201911L4

MLX (NM_198204) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: MLX (NM_198204) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: MLX

Synonyms: bHLHd13; MAD7; MXD7; TCFL4; TF4

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC201911).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_198204

ORF Size: 732 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

MLX (NM_198204) Human Tagged Lenti ORF Clone - RC201911L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: NM 198204.1, NP 937847.1

RefSeq Size: 2406 bp
RefSeq ORF: 735 bp
Locus ID: 6945
UniProt ID: Q9UH92

Cytogenetics: 17q21.2

Protein Families: Druggable Genome, Transcription Factors

MW: 27.9 kDa

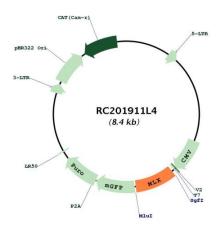

Gene Summary: The product of this gene belongs to the family of basic helix-loop-helix leucine zipper (bHLH-

Zip) transcription factors. These factors form heterodimers with Mad proteins and play a role in proliferation, determination and differentiation. This gene product may act to diversify Mad family function by its restricted association with a subset of the Mad family of transcriptional repressors, namely, Mad1 and Mad4. Alternatively spliced transcript variants encoding

different isoforms have been identified for this gene. [provided by RefSeq, Jul 2008]
