# Product datasheet for RC201921L2

# Prion protein PrP (PRNP) (NM\_001080123) Human Tagged Lenti ORF Clone

## **Product data:**

Product Type:	Expression Plasmids
Product Name:	Prion protein PrP (PRNP) (NM_001080123) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	Prion protein PrP
Synonyms:	AltPrP; ASCR; CD230; CJD; GSS; KURU; p27-30; PRIP; PrP; PrP27-30; PrP33-35C; PrPc
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC201921).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GCC         ATG          NNN         ACG CGT

ACCN: ORF Size: NM\_001080123 759 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

<b>ORIGENE P</b>	rion protein PrP (PRNP) (NM_001080123) Human Tagged Lenti ORF Clone – RC201921L2
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Met	<ul> <li>chod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 001080123.1</u>
RefSeq Size:	2619 bp
RefSeq ORF:	762 bp
Locus ID:	5621
UniProt ID:	<u>P04156</u>
Cytogenetics:	20p13
Protein Families:	ES Cell Differentiation/IPS, Stem cell - Pluripotency, Transmembrane
Protein Pathways:	Prion diseases
MW:	27.6 kDa

### **CRIGENE** Prion protein PrP (PRNP) (NM\_001080123) Human Tagged Lenti ORF Clone – RC201921L2

# Gene Summary:The protein encoded by this gene is a membrane glycosylphosphatidylinositol-anchored<br/>glycoprotein that tends to aggregate into rod-like structures. The encoded protein contains a<br/>highly unstable region of five tandem octapeptide repeats. This gene is found on<br/>chromosome 20, approximately 20 kbp upstream of a gene which encodes a biochemically<br/>and structurally similar protein to the one encoded by this gene. Mutations in the repeat<br/>region as well as elsewhere in this gene have been associated with Creutzfeldt-Jakob disease,<br/>fatal familial insomnia, Gerstmann-Straussler disease, Huntington disease-like 1, and kuru. An<br/>overlapping open reading frame has been found for this gene that encodes a smaller,<br/>structurally unrelated protein, AltPrp. Alternative splicing results in multiple transcript<br/>variants. [provided by RefSeq, Nov 2014]
