## TARS (TARS1) (NM\_152295) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

Product Type: Lentiviral Particles

Product Name: TARS (TARS1) (NM\_152295) Human Tagged ORF Clone Lentiviral Particle

Symbol: TARS1

**Synonyms:** TARS; ThrRS; TTD7

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK
ACCN: NM 152295

ORF Size: 2169 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC202140).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 152295.4

 RefSeq Size:
 2888 bp

 RefSeq ORF:
 2172 bp

 Locus ID:
 6897

 UniProt ID:
 P26639

 Cytogenetics:
 5p13.3

**Domains:** tRNA-synt\_2b, TGS, HGTP\_anticodon

**Protein Families:** Druggable Genome

## TARS (TARS1) (NM\_152295) Human Tagged ORF Clone Lentiviral Particle - RC202140L3V

**Protein Pathways:** Aminoacyl-tRNA biosynthesis

MW: 105.8 kDa

**Gene Summary:** Aminoacyl-tRNA synthetases catalyze the aminoacylation of tRNA by their cognate amino

acid. Because of their central role in linking amino acids with nucleotide triplets contained in tRNAs, aminoacyl-tRNA synthetases are thought to be among the first proteins that appeared in evolution. Threonyl-tRNA synthetase belongs to the class-II aminoacyl-tRNA synthetase

family [provided by RefSeq, Jul 2008]
