

Product datasheet for RC202205L4

.202203L4

STYX (NM_145251) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: STYX (NM_145251) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: STYX

Mammalian Cell Puromycin

Selection:

Vector:

pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

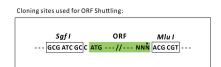

ORF Nucleotide The ORF insert of this cl

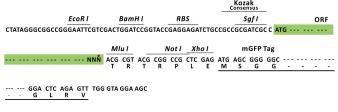

Sequence:

The ORF insert of this clone is exactly the same as(RC202205).

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_145251

ORF Size: 669 bp

STYX (NM_145251) Human Tagged Lenti ORF Clone - RC202205L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 145251.2</u>

RefSeq Size: 4879 bp
RefSeq ORF: 672 bp
Locus ID: 6815
UniProt ID: 08WUI0

UniProt ID: Q8WUJ0

Cytogenetics: 14q22.1

Domains: DSPc

Protein Families: Druggable Genome, Phosphatase

MW: 25.5 kDa

Gene Summary: The protein encoded by this gene is a pseudophosphatase, able to bind potential substrates

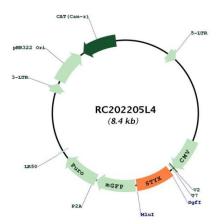

but lacking an active catalytic loop. The encoded protein may be involved in spermiogenesis.

Two transcript variants encoding the same protein have been found for these genes.
