

# Product datasheet for RC202207L1

## PDK3 (NM\_005391) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	PDK3 (NM_005391) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	PDK3
Synonyms:	CMTX6; GS1-358P8.4
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC202207).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Miu I          GCG ATC GC         ATG// NNN         ACG CGT

 $\begin{tabular}{cccc} \hline & \underline{BamH1} & \underline{RBS} & \underline{Sgfi} & ORF \\ \hline & \underline{Sgfi} & \underline{Sgfi} & ORF \\ \hline & \underline{Sgfi} & \underline{Sgfi} & \underline{Sgfi} & ORF \\ \hline & \underline{Sgfi} & \underline{Sgfi} & \underline{Sgfi} & \underline{Sgfi} \\ \hline & \underline{Sg$ 

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_005391 1218 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# **PDK3 (NM\_005391) Human Tagged Lenti ORF Clone – RC202207L1**

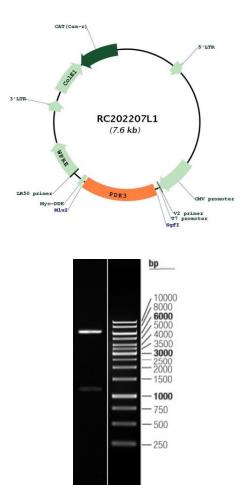

OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery. The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through
	naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 005391.1</u>
RefSeq Size:	1803 bp
RefSeq ORF:	1221 bp
Locus ID:	5165
UniProt ID:	<u>Q15120</u>
Cytogenetics:	Xp22.11
Domains:	HATPase_c
Protein Families:	Druggable Genome, Protein Kinase
MW:	46.9 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### CRIGENE PDK3 (NM\_005391) Human Tagged Lenti ORF Clone – RC202207L1

# Gene Summary:The pyruvate dehydrogenase (PDH) complex is a nuclear-encoded mitochondrial<br/>multienzyme complex that catalyzes the overall conversion of pyruvate to acetyl-CoA and<br/>CO(2). It provides the primary link between glycolysis and the tricarboxylic acid (TCA) cycle,<br/>and thus is one of the major enzymes responsible for the regulation of glucose metabolism.<br/>The enzymatic activity of PDH is regulated by a phosphorylation/dephosphorylation cycle,<br/>and phosphorylation results in inactivation of PDH. The protein encoded by this gene is one<br/>of the three pyruvate dehydrogenase kinases that inhibits the PDH complex by<br/>phosphorylation of the E1 alpha subunit. This gene is predominantly expressed in the heart<br/>and skeletal muscles. Alternatively spliced transcript variants encoding different isoforms<br/>have been found for this gene. [provided by RefSeq, Mar 2010]
