

Product datasheet for RC202338L1V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Profilin 1 (PFN1) (NM_005022) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Profilin 1 (PFN1) (NM_005022) Human Tagged ORF Clone Lentiviral Particle

Symbol: Profilin 1
Synonyms: ALS18

Mammalian Cell Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

 Tag:
 Myc-DDK

 ACCN:
 NM_005022

ORF Size: 420 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC202338).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 005022.2

 RefSeq Size:
 1365 bp

 RefSeq ORF:
 423 bp

 Locus ID:
 5216

 UniProt ID:
 P07737

 Cytogenetics:
 17p13.2

 Domains:
 PROF

Protein Families: Druggable Genome, Stem cell - Pluripotency

Profilin 1 (PFN1) (NM_005022) Human Tagged ORF Clone Lentiviral Particle - RC202338L1V

Protein Pathways: Regulation of actin cytoskeleton

MW: 15.1 kDa

Gene Summary: This gene encodes a member of the profilin family of small actin-binding proteins. The

encoded protein plays an important role in actin dynamics by regulating actin polymerization in response to extracellular signals. Deletion of this gene is associated with Miller-Dieker syndrome, and the encoded protein may also play a role in Huntington disease. Multiple pseudogenes of this gene are located on chromosome 1. [provided by RefSeq, Jul 2012]
