Centrin 2 (CETN2) (NM_004344) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Centrin 2 (CETN2) (NM_004344) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Centrin 2

Synonyms: CALT; CEN2

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

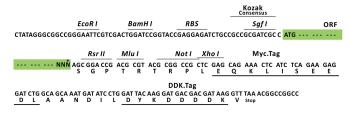

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC202422).

Sequence:

Restriction Sites: Sgfl-Rsrll

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_004344

ORF Size: 516 bp

Centrin 2 (CETN2) (NM_004344) Human Tagged Lenti ORF Clone - RC202422L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 004344.1</u>

 RefSeq Size:
 1087 bp

 RefSeq ORF:
 519 bp

 Locus ID:
 1069

 UniProt ID:
 P41208

Cytogenetics: Xq28

Domains:

Protein Families: Druggable Genome

Protein Pathways: Nucleotide excision repair

EFh

MW: 19.7 kDa

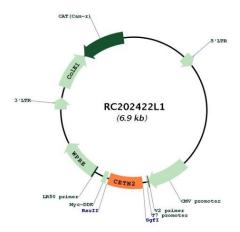

Gene Summary: Caltractin belongs to a family of calcium-binding proteins and is a structural component of

the centrosome. The high level of conservation from algae to humans and its association with the centrosome suggested that caltractin plays a fundamental role in the structure and function of the microtubule-organizing center, possibly required for the proper duplication

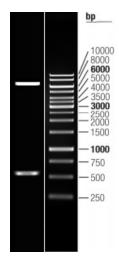

and segregation of the centrosome. [provided by RefSeq, Jul 2008]
