

Product datasheet for **RC202557L2V**

Nck beta (NCK2) (NM_003581) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | Nck beta (NCK2) (NM_003581) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | Nck beta |
| Synonyms: | GRB4; NCKbeta |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-mGFP (PS100071) |
| Tag: | mGFP |
| ACCN: | NM_003581 |
| ORF Size: | 1140 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC202557). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_003581.2 |
| RefSeq Size: | 2517 bp |
| RefSeq ORF: | 1143 bp |
| Locus ID: | 8440 |
| UniProt ID: | O43639 |
| Cytogenetics: | 2q12.2 |
| Domains: | SH2, SH3 |
| Protein Families: | Druggable Genome |

Protein Pathways: Axon guidance, ErbB signaling pathway, Pathogenic Escherichia coli infection, T cell receptor signaling pathway

MW: 42.9 kDa

Gene Summary: This gene encodes a member of the NCK family of adaptor proteins. The protein contains three SH3 domains and one SH2 domain. The protein has no known catalytic function but has been shown to bind and recruit various proteins involved in the regulation of receptor protein tyrosine kinases. It is through these regulatory activities that this protein is believed to be involved in cytoskeletal reorganization. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. [provided by RefSeq, Jul 2008]
