## Creatine kinase M type (CKM) (NM 001824) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** Creatine kinase M type (CKM) (NM 001824) Human Tagged ORF Clone Lentiviral Particle

Symbol: Creatine kinase M type CKMM; CPK-M; M-CK Synonyms:

**Mammalian Cell** 

Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

Myc-DDK Tag: NM 001824 ACCN: **ORF Size:** 1143 bp

**ORF Nucleotide** 

OTI Disclaimer:

Sequence:

The ORF insert of this clone is exactly the same as(RC202721).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This

clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 001824.2

RefSeq Size: 1666 bp RefSeq ORF: 1146 bp Locus ID: 1158 **UniProt ID:** P06732 Cytogenetics: 19q13.32

**Domains:** ATP-gua\_Ptrans

**Protein Families:** Druggable Genome

## Creatine kinase M type (CKM) (NM\_001824) Human Tagged ORF Clone Lentiviral Particle – RC202721L1V

**Protein Pathways:** Arginine and proline metabolism, Metabolic pathways

MW: 43.1 kDa

**Gene Summary:** The protein encoded by this gene is a cytoplasmic enzyme involved in energy homeostasis

and is an important serum marker for myocardial infarction. The encoded protein reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in striated muscle as well as in other tissues, and as a heterodimer with a similar brain isozyme in heart. The encoded protein is a member of the

ATP:guanido phosphotransferase protein family. [provided by RefSeq, Jul 2008]
