

# Product datasheet for RC202736L4

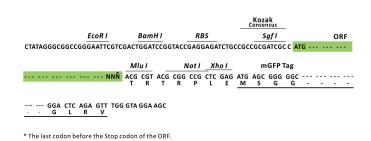

# CDK7 (NM\_001799) Human Tagged Lenti ORF Clone

## **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	CDK7 (NM_001799) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	CDK7
Synonyms:	CAK; CAK1; CDKN7; HCAK; MO15; p39MO15; STK1
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC202736).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling: Sgf i ORF Miu i GCG ATC GC ATG NNŇ ACG CGT

ACCN: ORF Size: NM\_001799 1038 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# CDK7 (NM\_001799) Human Tagged Lenti ORF Clone - RC202736L4

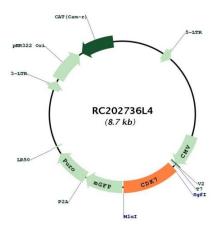

OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 001799.2</u>
RefSeq Size:	1534 bp
RefSeq ORF:	1041 bp
Locus ID:	1022
UniProt ID:	<u>P50613</u>
Cytogenetics:	5q13.2
Domains:	pkinase, TyrKc, S_TKc
Protein Families:	Druggable Genome, Protein Kinase, Stem cell - Pluripotency, Transcription Factors
Protein Pathways:	Cell cycle, Nucleotide excision repair
MW:	39.1 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

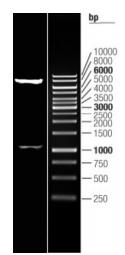

### CDK7 (NM\_001799) Human Tagged Lenti ORF Clone – RC202736L4

# Gene Summary:The protein encoded by this gene is a member of the cyclin-dependent protein kinase (CDK)<br/>family. CDK family members are highly similar to the gene products of Saccharomyces<br/>cerevisiae cdc28, and Schizosaccharomyces pombe cdc2, and are known to be important<br/>regulators of cell cycle progression. This protein forms a trimeric complex with cyclin H and<br/>MAT1, which functions as a Cdk-activating kinase (CAK). It is an essential component of the<br/>transcription factor TFIIH, that is involved in transcription initiation and DNA repair. This<br/>protein is thought to serve as a direct link between the regulation of transcription and the cell<br/>cycle. [provided by RefSeq, Jul 2008]
