

Product datasheet for RC202749L4

NFYB (NM_006166) Human Tagged Lenti ORF Clone

Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

EU: info-de@origene.com CN: techsupport@origene.cn

Product data:

Product Type: Expression Plasmids

Product Name: NFYB (NM_006166) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: NFYB

Synonyms: CBF-A; CBF-B; HAP3; NF-YB

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC202749).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_006166

ORF Size: 621 bp

NFYB (NM_006166) Human Tagged Lenti ORF Clone - RC202749L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 006166.3</u>

RefSeq Size: 3482 bp
RefSeq ORF: 624 bp
Locus ID: 4801

 UniProt ID:
 P25208

 Cytogenetics:
 12q23.3

Domains: CBFD NFYB HMF

Protein Families: Transcription Factors

Protein Pathways: Antigen processing and presentation

MW: 22.8 kDa

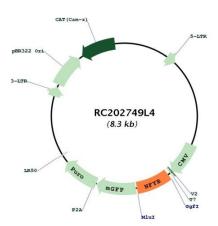

Gene Summary: The protein encoded by this gene is one subunit of a trimeric complex, forming a highly

conserved transcription factor that binds with high specificity to CCAAT motifs in the

promoter regions in a variety of genes. This gene product, subunit B, forms a tight dimer with the C subunit, a prerequisite for subunit A association. The resulting trimer binds to DNA with high specificity and affinity. Subunits B and C each contain a histone-like motif. Observation of the histone nature of these subunits is supported by two types of evidence; protein sequence alignments and experiments with mutants. [provided by RefSeq, Jul 2008]
