

Product datasheet for **RC202938L3V**

AMPD2 (NM_139156) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Type: | Lentiviral Particles |
| Product Name: | AMPD2 (NM_139156) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | AMPD2 |
| Synonyms: | PCH9; SPG63 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_139156 |
| ORF Size: | 2394 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC202938). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_139156.2 |
| RefSeq Size: | 3785 bp |
| RefSeq ORF: | 2397 bp |
| Locus ID: | 271 |
| UniProt ID: | Q01433 |
| Cytogenetics: | 1p13.3 |
| Protein Families: | Druggable Genome |
| Protein Pathways: | Metabolic pathways, Purine metabolism |

MW: 92.1 kDa

Gene Summary: The protein encoded by this gene is important in purine metabolism by converting AMP to IMP. The encoded protein, which acts as a homotetramer, is one of three AMP deaminases found in mammals. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Apr 2012]
