

## Product datasheet for **RC203017L3V**

### **C1orf57 (NTPCR) (NM\_032324) Human Tagged ORF Clone Lentiviral Particle**

#### **Product data:**

|                           |  |
|---------------------------|--|
| Product Type:             | Lentiviral Particles   |
| Product Name:             | C1orf57 (NTPCR) (NM_032324) Human Tagged ORF Clone Lentiviral Particle   |
| Symbol:                   | C1orf57  |
| Synonyms:                 | C1orf57; HCR-NTPase; THEP1   |
| Mammalian Cell Selection: | Puromycin  |
| Vector:                   | pLenti-C-Myc-DDK-P2A-Puro (PS100092)   |
| Tag:                      | Myc-DDK  |
| ACCN:                     | NM_032324  |
| ORF Size:                 | 570 bp   |
| ORF Nucleotide Sequence:  | The ORF insert of this clone is exactly the same as(RC203017).   |
| OTI Disclaimer:           | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <a href="#">More info</a> |
| OTI Annotation:           | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| RefSeq:                   | <a href="#">NM_032324.1</a>  |
| RefSeq Size:              | 926 bp   |
| RefSeq ORF:               | 573 bp   |
| Locus ID:                 | 84284  |
| UniProt ID:               | <a href="#">Q9BSD7</a>   |
| Cytogenetics:             | 1q42.2   |
| Domains:                  | AAA, DUF265  |
| Protein Families:         | Protease   |

**MW:** 20.7 kDa

**Gene Summary:** The protein encoded by this gene is a non-specific nucleoside triphosphatase that is slow-acting in vitro. This gene is overexpressed in many tumor tissues, and while it is not essential for the cell, overexpression is cytotoxic. However, the cytotoxicity is not related to its triphosphatase activity. [provided by RefSeq, Jul 2016]
