hCG (CGA) (NM_000735) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: hCG (CGA) (NM_000735) Human Tagged ORF Clone Lentiviral Particle

Symbol:

CG-ALPHA; FSHA; GPA1; GPHa; GPHA1; HCG; LHA; TSHA Synonyms:

Mammalian Cell

Selection:

ACCN:

None

Vector: pLenti-C-Myc-DDK (PS100064)

Tag: Myc-DDK NM 000735

ORF Size: 348 bp

ORF Nucleotide

OTI Disclaimer:

Sequence:

The ORF insert of this clone is exactly the same as(RC203146).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 000735.2

RefSeq Size: 768 bp RefSeq ORF: 351 bp Locus ID: 1081 **UniProt ID:** P01215 Cytogenetics: 6q14.3 **Domains:** GHA

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein

hCG (CGA) (NM_000735) Human Tagged ORF Clone Lentiviral Particle - RC203146L1V

Protein Pathways: Autoimmune thyroid disease, GnRH signaling pathway, Neuroactive ligand-receptor

interaction

MW: 13 kDa

Gene Summary: The four human glycoprotein hormones chorionic gonadotropin (CG), luteinizing hormone

(LH), follicle stimulating hormone (FSH), and thyroid stimulating hormone (TSH) are dimers consisting of alpha and beta subunits that are associated noncovalently. The alpha subunits of these hormones are identical, however, their beta chains are unique and confer biological

specificity. The protein encoded by this gene is the alpha subunit and belongs to the glycoprotein hormones alpha chain family. Two transcript variants encoding different

isoforms have been found for this gene. [provided by RefSeq, Nov 2011]
