## hCG (CGA) (NM\_000735) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** hCG (CGA) (NM\_000735) Human Tagged ORF Clone Lentiviral Particle

Symbol: hCG

Synonyms: CG-ALPHA; FSHA; GPA1; GPHA1; HCG; LHA; TSHA

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK
ACCN: NM 000735

ORF Size: 348 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC203146).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 000735.2

 RefSeq Size:
 768 bp

 RefSeq ORF:
 351 bp

 Locus ID:
 1081

 UniProt ID:
 P01215

 Cytogenetics:
 6q14.3

 Domains:
 GHA

**Protein Families:** Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein

## hCG (CGA) (NM\_000735) Human Tagged ORF Clone Lentiviral Particle - RC203146L3V

**Protein Pathways:** Autoimmune thyroid disease, GnRH signaling pathway, Neuroactive ligand-receptor

interaction

**MW:** 13 kDa

**Gene Summary:** The four human glycoprotein hormones chorionic gonadotropin (CG), luteinizing hormone

(LH), follicle stimulating hormone (FSH), and thyroid stimulating hormone (TSH) are dimers consisting of alpha and beta subunits that are associated noncovalently. The alpha subunits of these hormones are identical, however, their beta chains are unique and confer biological

specificity. The protein encoded by this gene is the alpha subunit and belongs to the glycoprotein hormones alpha chain family. Two transcript variants encoding different

isoforms have been found for this gene. [provided by RefSeq, Nov 2011]
