## AKR1B10 (NM\_020299) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** AKR1B10 (NM\_020299) Human Tagged ORF Clone Lentiviral Particle

Symbol: AKR1B10

Synonyms: AKR1B11; AKR1B12; ALDRLn; ARL-1; ARL1; HIS; HSI

Mammalian Cell

Selection:

None

**Vector:** pLenti-C-mGFP (PS100071)

Tag: mGFP

**ACCN:** NM\_020299

ORF Size: 948 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC203177).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeq:** NM 020299.3, NP 064695.2

 RefSeq Size:
 1610 bp

 RefSeq ORF:
 951 bp

 Locus ID:
 57016

 UniProt ID:
 060218

 Cytogenetics:
 7q33

**Domains:** aldo\_ket\_red

**Protein Families:** Druggable Genome

## AKR1B10 (NM\_020299) Human Tagged ORF Clone Lentiviral Particle - RC203177L2V

**Protein Pathways:** Butanoate metabolism, Fructose and mannose metabolism, Linoleic acid metabolism,

Metabolic pathways

**MW:** 36 kDa

Gene Summary: This gene encodes a member of the aldo/keto reductase superfamily, which consists of more

than 40 known enzymes and proteins. This member can efficiently reduce aliphatic and aromatic aldehydes, and it is less active on hexoses. It is highly expressed in adrenal gland, small intestine, and colon, and may play an important role in liver carcinogenesis. [provided

by RefSeq, Jul 2008]
