

Product datasheet for **RC203182L2V**

SDHB (NM_003000) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | SDHB (NM_003000) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | SDHB |
| Synonyms: | CWS2; IP; MC2DN4; PGL4; SDH; SDH1; SDH2; SDHIP |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-mGFP (PS100071) |
| Tag: | mGFP |
| ACCN: | NM_003000 |
| ORF Size: | 840 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC203182). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_003000.2 |
| RefSeq Size: | 1161 bp |
| RefSeq ORF: | 843 bp |
| Locus ID: | 6390 |
| UniProt ID: | P21912 |
| Cytogenetics: | 1p36.13 |
| Domains: | fer2 |
| Protein Families: | Druggable Genome |

Protein Pathways: Alzheimer's disease, Citrate cycle (TCA cycle), Huntington's disease, Metabolic pathways, Oxidative phosphorylation, Parkinson's disease

MW: 31.6 kDa

Gene Summary: Complex II of the respiratory chain, which is specifically involved in the oxidation of succinate, carries electrons from FADH to CoQ. The complex is composed of four nuclear-encoded subunits and is localized in the mitochondrial inner membrane. The iron-sulfur subunit is highly conserved and contains three cysteine-rich clusters which may comprise the iron-sulfur centers of the enzyme. Sporadic and familial mutations in this gene result in paragangliomas and pheochromocytoma, and support a link between mitochondrial dysfunction and tumorigenesis. [provided by RefSeq, Jul 2008]

Product images:

[RC203182L2] was used to prepare Lentiviral particles using [TR30037] packaging kit. HEK293T cells were transduced with RC203182L2V particle to overexpress human SDHB-mGFP fusion protein.
