

# Product datasheet for RC203198L1

## ATP1A3 (NM\_152296) Human Tagged Lenti ORF Clone

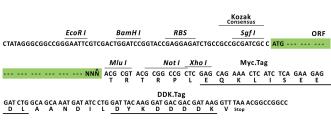

**Expression Plasmids** 

## **Product data:**

**Product Type:** 

# ATD1A2 (NIM 1E2206) Human Tagged Lenti ODE Clone

Product Name:	ATP1A3 (NM_152296) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	ATP1A3
Synonyms:	AHC2; ATP1A1; CAPOS; DYT12; RDP
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC203198).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgfi ORF Miu i

--- GCG ATC GC C ATG --- // --- NNN ACG CGT -

\* The last codon before the Stop codon of the ORF.

ACCN: **ORF Size:**  NM\_152296 3039 bp

Service ATP1A3 (NM_152296) Human Tagged Lenti ORF Clone – RC203198L1	
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 152296.3</u>
RefSeq Size:	3635 bp
RefSeq ORF:	3042 bp
Locus ID:	478
UniProt ID:	<u>P13637</u>
Cytogenetics:	19q13.2
Domains:	E1-E2_ATPase, Cation_ATPase_N, Hydrolase, Cation_ATPase_C
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways:	Cardiac muscle contraction
MW:	111.7 kDa
Gene Summary:	The protein encoded by this gene belongs to the family of P-type cation transport ATPases, and to the subfamily of Na+/K+ -ATPases. Na+/K+ -ATPase is an integral membrane protein responsible for establishing and maintaining the electrochemical gradients of Na and K ions across the plasma membrane. These gradients are essential for osmoregulation, for sodium-coupled transport of a variety of organic and inorganic molecules, and for electrical excitability of nerve and muscle. This enzyme is composed of two subunits, a large catalytic subunit (alpha) and a smaller glycoprotein subunit (beta). The catalytic subunit of Na+/K+ -

ATPase is encoded by multiple genes. This gene encodes an alpha 3 subunit. Alternatively

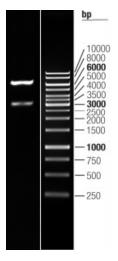

spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jan 2012]
