

Product datasheet for RC203269L3

duct datasilect for Re203203E3

SDHD (NM_003002) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: SDHD (NM_003002) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: SDHD

Synonyms: CBT1; CII-4; CWS3; cybS; MC2DN3; PGL; PGL1; QPs3; SDH4

Mammalian Cell Puromycin

Selection:

Vector:

pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC203269).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

st The last codon before the Stop codon of the ORF.

ACCN: NM_003002

ORF Size: 477 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

SDHD (NM_003002) Human Tagged Lenti ORF Clone - RC203269L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 003002.1</u>

RefSeq Size: 1395 bp

RefSeq ORF: 480 bp

Locus ID: 6392 UniProt ID: <u>014521</u>

Cytogenetics: 11q23.1

Protein Pathways: Alzheimer's disease, Citrate cycle (TCA cycle), Huntington's disease, Metabolic pathways,

Oxidative phosphorylation, Parkinson's disease

MW: 17 kDa

Gene Summary: This gene encodes a member of complex II of the respiratory chain, which is responsible for

the oxidation of succinate. The encoded protein is one of two integral membrane proteins anchoring the complex to the matrix side of the mitochondrial inner membrane. Mutations in this gene are associated with the formation of tumors, including hereditary paraganglioma. Transmission of disease occurs almost exclusively through the paternal allele, suggesting that

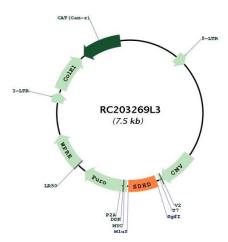

this locus may be maternally imprinted. There are pseudogenes for this gene on

chromosomes 1, 2, 3, 7, and 18. Alternative splicing results in multiple transcript variants.
