NUDT6 (NM_007083) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: NUDT6 (NM_007083) Human Tagged Lenti ORF Clone

Tag: Myc-DDK Symbol: NUDT6

Synonyms: ASFGF2; FGF-AS; FGF2AS; GFG-1; GFG1

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

The ORF insert of this clone is exactly the same as(RC203470). **ORF Nucleotide**

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_007083

ORF Size: 948 bp

NUDT6 (NM_007083) Human Tagged Lenti ORF Clone - RC203470L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

NUDIX

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 007083.3</u>

RefSeq Size: 1197 bp

RefSeq ORF: 951 bp

Locus ID: 11162

UniProt ID: <u>P53370</u>

Cytogenetics: 4q28.1

Domains:

MW: 35.7 kDa

Gene Summary: This gene overlaps and lies on the opposite strand from FGF2 gene, and is thought to be the

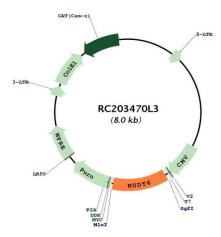

FGF2 antisense gene. The two genes are independently transcribed, and their expression shows an inverse relationship, suggesting that this antisense transcript may regulate FGF2 expression. This gene has also been shown to have hormone-regulatory and antiproliferative

actions in the pituitary that are independent of FGF2 expression. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by

RefSeq, Oct 2011]
