

Product datasheet for **RC203500L2V**

IRF1 (NM_002198) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | IRF1 (NM_002198) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | IRF1 |
| Synonyms: | IRF-1; MAR |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-mGFP (PS100071) |
| Tag: | mGFP |
| ACCN: | NM_002198 |
| ORF Size: | 975 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC203500). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_002198.1 |
| RefSeq Size: | 3567 bp |
| RefSeq ORF: | 978 bp |
| Locus ID: | 3659 |
| UniProt ID: | P10914 |
| Cytogenetics: | 5q31.1 |
| Domains: | IRF |
| Protein Families: | Druggable Genome, Transcription Factors |

MW: 36.5 kDa

Gene Summary: The protein encoded by this gene is a transcriptional regulator and tumor suppressor, serving as an activator of genes involved in both innate and acquired immune responses. The encoded protein activates the transcription of genes involved in the body's response to viruses and bacteria, playing a role in cell proliferation, apoptosis, the immune response, and DNA damage response. This protein represses the transcription of several other genes. As a tumor suppressor, it both suppresses tumor cell growth and stimulates an immune response against tumor cells. Defects in this gene have been associated with gastric cancer, myelogenous leukemia, and lung cancer. [provided by RefSeq, Aug 2017]
