### Creatine kinase B type (CKB) (NM\_001823) Human Tagged Lenti ORF Clone

**Product data:** 

**Product Type:** Expression Plasmids

**Product Name:** Creatine kinase B type (CKB) (NM\_001823) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

**Symbol:** Creatine kinase B type

Synonyms: B-CK; BCK; CKBB; CPK-B; HEL-211; HEL-S-29

Puromycin

Sgfl-Mlul

Mammalian Cell

Selection:

Vector:

pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC203669).

Sequence:

Restriction Sites: Cloning Scheme:

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_001823

ORF Size: 1143 bp

#### Creatine kinase B type (CKB) (NM\_001823) Human Tagged Lenti ORF Clone - RC203669L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 001823.3</u>

RefSeq Size: 1475 bp
RefSeq ORF: 1146 bp
Locus ID: 1152

 UniProt ID:
 P12277

 Cytogenetics:
 14q32.33

**Domains:** ATP-gua Ptrans

**Protein Families:** Druggable Genome

**Protein Pathways:** Arginine and proline metabolism, Metabolic pathways

MW: 42.6 kDa

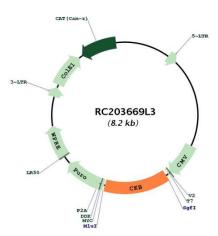

**Gene Summary:** The protein encoded by this gene is a cytoplasmic enzyme involved in energy homeostasis.

The encoded protein reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in brain as well as in other tissues, and as a heterodimer with a similar muscle isozyme in heart. The encoded protein is a member of the ATP:guanido phosphotransferase protein family. A pseudogene of this gene

has been characterized. [provided by RefSeq, Jul 2008]
