## Creatine kinase B type (CKB) (NM\_001823) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** Creatine kinase B type (CKB) (NM\_001823) Human Tagged ORF Clone Lentiviral Particle

**Symbol:** Creatine kinase B type

Synonyms: B-CK; BCK; CKBB; CPK-B; HEL-211; HEL-S-29

**Mammalian Cell** 

Selection:

Puromycin

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

**ACCN:** NM\_001823 **ORF Size:** 1143 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC203669).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 001823.3

 RefSeq Size:
 1475 bp

 RefSeq ORF:
 1146 bp

 Locus ID:
 1152

 UniProt ID:
 P12277

 Cytogenetics:
 14q32.33

**Domains:** ATP-gua\_Ptrans

**Protein Families:** Druggable Genome

## Creatine kinase B type (CKB) (NM\_001823) Human Tagged ORF Clone Lentiviral Particle – RC203669L4V

**Protein Pathways:** Arginine and proline metabolism, Metabolic pathways

MW: 42.6 kDa

**Gene Summary:** The protein encoded by this gene is a cytoplasmic enzyme involved in energy homeostasis.

The encoded protein reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in brain as well as in other tissues, and as a heterodimer with a similar muscle isozyme in heart. The encoded protein is a member of the ATP:guanido phosphotransferase protein family. A pseudogene of this gene

has been characterized. [provided by RefSeq, Jul 2008]
