

# Product datasheet for RC204230L2

# FGFR4 (NM\_002011) Human Tagged Lenti ORF Clone

# **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	FGFR4 (NM_002011) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	FGFR4
Synonyms:	CD334; JTK2; TKF
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC204230).
<b>Restriction Sites:</b>	Sgfl-Notl
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgfi ORF Noti
	···· GCG ATC GC ATG ···//··· NNN AC G CGG CCG C TC ···

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_002011 2406 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	GFR4 (NM_002011) Human Tagged Lenti ORF Clone – RC204230L2
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Met	<ul> <li>hod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 002011.3</u>
RefSeq Size:	3040 bp
RefSeq ORF:	2409 bp
Locus ID:	2264
UniProt ID:	<u>P22455</u>
Cytogenetics:	5q35.2
Domains:	pkinase, TyrKc, S_TKc, ig, IGc2, IG
Protein Families:	Druggable Genome, Protein Kinase
Protein Pathways:	Endocytosis, MAPK signaling pathway, Regulation of actin cytoskeleton
MW:	87.95 kDa

### GRIGENE FGFR4 (NM\_002011) Human Tagged Lenti ORF Clone – RC204230L2

Gene Summary:The protein encoded by this gene is a tyrosine kinase and cell surface receptor for fibroblast<br/>growth factors. The encoded protein is involved in the regulation of several pathways,<br/>including cell proliferation, cell differentiation, cell migration, lipid metabolism, bile acid<br/>biosynthesis, vitamin D metabolism, glucose uptake, and phosphate homeostasis. This<br/>protein consists of an extracellular region, composed of three immunoglobulin-like domains,<br/>a single hydrophobic membrane-spanning segment, and a cytoplasmic tyrosine kinase<br/>domain. The extracellular portion interacts with fibroblast growth factors, setting in motion a<br/>cascade of downstream signals, ultimately influencing mitogenesis and differentiation.<br/>[provided by RefSeq, Aug 2017]
