## Product datasheet for RC204423L4V

## Kallikrein 7 (KLK7) (NM\_005046) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | Kallikrein 7 (KLK7) (NM_005046) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | Kallikrein 7  |
| Synonyms:                    | hK7; PRSS6; SCCE  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-mGFP-P2A-Puro (PS100093)   |
| Tag:                         | mGFP  |
| ACCN:                        | NM_005046   |
| ORF Size:                    | 759 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC204423).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 005046.2</u>  |
| RefSeq Size:                 | 2104 bp   |
| RefSeq ORF:                  | 762 bp  |
| Locus ID:                    | 5650  |
| UniProt ID:                  | <u>P49862</u>   |
| Cytogenetics:                | 19q13.41  |
| Protein Families:            | Druggable Genome, Secreted Protein  |
| MW:                          | 27.6 kDa  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a member of the kallikrein subfamily of serine proteases. These enzymes<br/>have diverse physiological functions and many kallikrein genes are biomarkers for cancer.<br/>The encoded protein has chymotrypsin-like activity and plays a role in the proteolysis of<br/>intercellular cohesive structures that precedes desquamation, the shedding of the outermost<br/>layer of the epidermis. The encoded protein may play a role in cancer invasion and<br/>metastasis, and increased expression of this gene is associated with unfavorable prognosis<br/>and progression of several types of cancer. Polymorphisms in this gene may play a role in the<br/>development of atopic dermatitis. Alternatively spliced transcript variants encoding multiple<br/>isoforms have been observed for this gene, which is one of fifteen kallikrein subfamily<br/>members located in a gene cluster on chromosome 19. [provided by RefSeq, May 2011]
