

# Product datasheet for RC204471L3

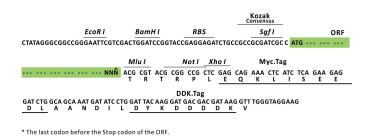

# TPP1 (NM\_000391) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | TPP1 (NM_000391) Human Tagged Lenti ORF Clone   |
| Tag:                         | Myc-DDK   |
| Symbol:                      | TPP1  |
| Synonyms:                    | CLN2; GIG1; LPIC; SCAR7; TPP-1  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC204471).                          |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              |   |
|                              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf1         ORF         Mlu I            GCG ATC GC         ATG // NNÑ         ACG CGT |

ACCN: ORF Size: NM\_000391 1689 bp

| ORÏGENE TPP1 (NM_000391) Human Tagged Lenti ORF Clone – RC204471L3 |  |
|--|--|
| OTI Disclaimer:  | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:  | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:  | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method:   | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>   |
| RefSeq:  | <u>NM 000391.3</u>   |
| RefSeq Size:   | 3540 bp  |
| RefSeq ORF:  | 1692 bp  |
| Locus ID:  | 1200   |
| UniProt ID:  | <u>014773</u>  |
| Cytogenetics:  | 11p15.4  |
| Protein Families:  | Protease   |
| Protein Pathways:  | Lysosome   |
| MW:  | 61.2 kDa   |
| Gene Summary:  | This gene encodes a member of the sedolisin family of serine proteases. The protease<br>functions in the lysosome to cleave N-terminal tripeptides from substrates, and has weaker<br>endopeptidase activity. It is synthesized as a catalytically-inactive enzyme which is activated<br>and auto-proteolyzed upon acidification. Mutations in this gene result in late-infantile<br>neuronal ceroid lipofuscinosis, which is associated with the failure to degrade specific<br>neuropeptides and a subunit of ATP synthase in the lysosome. [provided by RefSeq, Jul 2008] |
