## FGF21 (NM\_019113) Human Tagged Lenti ORF Clone

**Product data:** 

**Product Type: Expression Plasmids** 

**Product Name:** FGF21 (NM\_019113) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

**Mammalian Cell** 

Selection:

Symbol:

Puromycin

FGF21

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC204538).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

ACCN: NM\_019113

**ORF Size:** 627 bp

## FGF21 (NM\_019113) Human Tagged Lenti ORF Clone - RC204538L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

19q13.33

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**Note:** Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

**RefSeq:** <u>NM 019113.2</u>

 RefSeq Size:
 940 bp

 RefSeq ORF:
 630 bp

 Locus ID:
 26291

 UniProt ID:
 Q9NSA1

Cytogenetics:

**Protein Families:** Adult stem cells, Embryonic stem cells, ES Cell Differentiation/IPS, Secreted Protein

**Protein Pathways:** MAPK signaling pathway, Melanoma, Pathways in cancer, Regulation of actin cytoskeleton

**MW**: 19.4 kDa

**Gene Summary:** Theis gene encodes a member of the fibroblast growth factor (FGF) family. FGF family

members possess broad mitogenic and cell survival activities and are involved in a variety of biological processes. This protein is a secreted endocrine factor that functions as a major metabolic regulator. The encoded protein stimulates the uptake of glucose in adipose tissue.
