Junctional Adhesion Molecule 2 (JAM2) (NM 021219) Human Tagged ORF Clone Lentiviral **Particle**

Product data:

Product Type: Lentiviral Particles

Product Name: Junctional Adhesion Molecule 2 (JAM2) (NM_021219) Human Tagged ORF Clone Lentiviral

Particle

Symbol: Junctional Adhesion Molecule 2

Synonyms: C21orf43; CD322; IBGC8; JAM-B; JAMB; PRO245; VE-JAM; VEJAM

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Myc-DDK Tag: ACCN: NM 021219

ORF Size: 894 bp

ORF Nucleotide

Sequence:

OTI Disclaimer:

The ORF insert of this clone is exactly the same as(RC204633).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 021219.2

RefSeq Size: 4357 bp RefSeq ORF: 897 bp 58494 Locus ID: **UniProt ID:** P57087 Cytogenetics: 21q21.3

Domains: ig, IGc2, IG

Junctional Adhesion Molecule 2 (JAM2) (NM_021219) Human Tagged ORF Clone Lentiviral Particle – RC204633L3V

Protein Families: Druggable Genome, Transmembrane

Protein Pathways: Cell adhesion molecules (CAMs), Epithelial cell signaling in Helicobacter pylori infection,

Leukocyte transendothelial migration, Tight junction

MW: 33.2 kDa

Gene Summary: This gene belongs to the immunoglobulin superfamily, and the junctional adhesion molecule

(JAM) family. The protein encoded by this gene is a type I membrane protein that is localized at the tight junctions of both epithelial and endothelial cells. It acts as an adhesive ligand for interacting with a variety of immune cell types, and may play a role in lymphocyte homing to secondary lymphoid organs. Alternatively spliced transcript variants have been found for this

gene. [provided by RefSeq, Jul 2012]
