

## Product datasheet for **RC204648L3V**

### PSG6 (NM\_001031850) Human Tagged ORF Clone Lentiviral Particle

#### Product data:

|                           |  |
|---------------------------|--|
| Product Type:             | Lentiviral Particles   |
| Product Name:             | PSG6 (NM_001031850) Human Tagged ORF Clone Lentiviral Particle   |
| Symbol:                   | PSG6   |
| Synonyms:                 | PSBG-6; PSBG-10; PSBG-12; PSG10; PSGGB   |
| Mammalian Cell Selection: | Puromycin  |
| Vector:                   | pLenti-C-Myc-DDK-P2A-Puro (PS100092)   |
| Tag:                      | Myc-DDK  |
| ACCN:                     | NM_001031850   |
| ORF Size:                 | 1272 bp  |
| ORF Nucleotide Sequence:  | The ORF insert of this clone is exactly the same as(RC204648).   |
| OTI Disclaimer:           | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <a href="#">More info</a> |
| OTI Annotation:           | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| RefSeq:                   | <a href="#">NM_001031850.1</a>   |
| RefSeq Size:              | 1743 bp  |
| RefSeq ORF:               | 1275 bp  |
| Locus ID:                 | 5675   |
| UniProt ID:               | <a href="#">Q00889</a>   |
| Cytogenetics:             | 19q13.31   |
| Protein Families:         | Secreted Protein   |
| MW:                       | 47.5 kDa   |

**Gene Summary:**

This gene is a member of the pregnancy-specific glycoprotein (PSG) gene family. The PSG genes are a subgroup of the carcinoembryonic antigen (CEA) family of immunoglobulin-like genes, and are found in a gene cluster at 19q13.1-q13.2 telomeric to another cluster of CEA-related genes. The PSG genes are expressed by placental trophoblasts and released into the maternal circulation during pregnancy, and are thought to be essential for maintenance of normal pregnancy. The protein encoded by this gene contains the Arg-Gly-Asp tripeptide associated with cellular adhesion and recognition. Alternative splicing results in multiple transcript variants and protein isoforms. [provided by RefSeq, Jul 2012]
