## Product datasheet for RC204858L2V

## PROCR (NM\_006404) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | PROCR (NM_006404) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | PROCR   |
| Synonyms:                    | CCCA; CCD41; EPCR   |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-mGFP (PS100071)  |
| Tag:                         | mGFP  |
| ACCN:                        | NM_006404   |
| ORF Size:                    | 714 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC204858).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 006404.3</u>  |
| RefSeq Size:                 | 1506 bp   |
| RefSeq ORF:                  | 717 bp  |
| Locus ID:                    | 10544   |
| UniProt ID:                  | <u>Q9UNN8</u>   |
| Cytogenetics:                | 20q11.22  |
| Protein Families:            | Druggable Genome, ES Cell Differentiation/IPS, Transmembrane  |
| MW:                          | 26.6 kDa  |

Gene Summary:The protein encoded by this gene is a receptor for activated protein C, a serine protease<br/>activated by and involved in the blood coagulation pathway. The encoded protein is an N-<br/>glycosylated type I membrane protein that enhances the activation of protein C. Mutations in<br/>this gene have been associated with venous thromboembolism and myocardial infarction, as<br/>well as with late fetal loss during pregnancy. The encoded protein may also play a role in<br/>malarial infection and has been associated with cancer. [provided by RefSeq, Jul 2013]
