	CDX2 (NM_001265) Human Tagged ORF Clone Lentiviral Particle – RC204883L1V
MW:	33.5 kDa
Gene Summary:	This gene is a member of the caudal-related homeobox transcription factor gene family. The encoded protein is a major regulator of intestine-specific genes involved in cell growth an differentiation. This protein also plays a role in early embryonic development of the intestinal tract. Aberrant expression of this gene is associated with intestinal inflammation and tumorigenesis. [provided by RefSeq, Jan 2012]
