## Casein Kinase 1 delta (CSNK1D) (NM\_139062) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

Product Name: Casein Kinase 1 delta (CSNK1D) (NM\_139062) Human Tagged ORF Clone Lentiviral Particle

Symbol: Casein Kinase 1 delta

Synonyms: ASPS; CKI-delta; CKId; CKIdelta; FASPS2; HCKID

**Mammalian Cell** 

Selection:

None

**Vector:** pLenti-C-mGFP (PS100071)

Tag: mGFP

**ACCN:** NM\_139062 **ORF Size:** 1227 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC204965).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This

clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 139062.1

 RefSeq Size:
 3778 bp

 RefSeq ORF:
 1230 bp

 Locus ID:
 1453

 UniProt ID:
 P48730

 Cytogenetics:
 17q25.3

**Domains:** pkinase, TyrKc, S\_TKc

**Protein Families:** Druggable Genome, Protein Kinase

## Casein Kinase 1 delta (CSNK1D) (NM\_139062) Human Tagged ORF Clone Lentiviral Particle – RC204965L2V

Protein Pathways: Circadian rhythm - mammal, Gap junction, Hedgehog signaling pathway

MW: 46.8 kDa

Gene Summary: This gene is a member of the casein kinase I (CKI) gene family whose members have been

implicated in the control of cytoplasmic and nuclear processes, including DNA replication and repair. The encoded protein may also be involved in the regulation of apoptosis, circadian rhythm, microtubule dynamics, chromosome segregation, and p53-mediated effects on growth. The encoded protein is highly similar to the mouse and rat CK1 delta homologs. Three transcript variants encoding different isoforms have been found for this gene.
