	Casein Kinase 1 delta (CSNK1D) (NM_139062) Human Tagged ORF Clone Lentiviral Particle – RC204965L4V	
Protein Pathway	Circadian rhythm - mammal, Gap junction, Hedgehog signaling pathway	
MW:	46.8 kDa	
Gene Summary:	This gene is a member of the casein kinase I (CKI) gene family whose members have been implicated in the control of cytoplasmic and nuclear processes, including DNA replication and repair. The encoded protein may also be involved in the regulation of apoptosis, circadian rhythm, microtubule dynamics, chromosome segregation, and p53-mediated effects on growth. The encoded protein is highly similar to the mouse and rat CK1 delta homologs. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Feb 2014]
