## Product datasheet for RC205070L1V

## Aph 1b (APH1B) (NM\_031301) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | Aph 1b (APH1B) (NM_031301) Human Tagged ORF Clone Lentiviral Particle   |
| Symbol:                      | Aph 1b  |
| Synonyms:                    | APH-1B; PRO1328; PSFL; TAAV688  |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-Myc-DDK (PS100064)   |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_031301   |
| ORF Size:                    | 771 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC205070).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 031301.2</u>  |
| RefSeq Size:                 | 4205 bp   |
| RefSeq ORF:                  | 774 bp  |
| Locus ID:                    | 83464   |
| UniProt ID:                  | <u>Q8WW43</u>   |
| Cytogenetics:                | 15q22.2   |
| Protein Families:            | Transmembrane   |
| MW:                          | 28.5 kDa  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a multi-pass transmembrane protein that is a functional component of<br/>the gamma-secretase complex, which also contains presenilin and nicastrin. This protein<br/>represents a stabilizing cofactor for the presenilin holoprotein in the complex. The gamma-<br/>secretase complex catalyzes the cleavage of integral proteins such as notch receptors and<br/>beta-amyloid precursor protein. [provided by RefSeq, Sep 2011]
