| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |

Gene Summary:This gene encodes a microtubule-binding nuclear protein that localizes to the centrioles of<br/>dividing cells and differentiating multiciliated cells and negatively regulates centriole<br/>duplication. The encoded protein is closely associated with the centriole barrel, and resides in<br/>the centriole lumen. Naturally-occurring mutations in the orthologous mouse gene are<br/>associated with age-related retinal degeneration. [provided by RefSeq, Feb 2019]
