

## Product datasheet for RC205325L4

## Frizzled 9 (FZD9) (NM\_003508) Human Tagged Lenti ORF Clone

## **Product data:**

| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | Frizzled 9 (FZD9) (NM_003508) Human Tagged Lenti ORF Clone                      |
| Tag:                         | mGFP  |
| Symbol:                      | Frizzled 9  |
| Synonyms:                    | CD349; FZD3   |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-mGFP-P2A-Puro (PS100093)   |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC205325).                  |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf I         ORF         Mlu I           GCG ATC GC         ATG // NNÑ ACG CGT |

ACCN: ORF Size: NM\_003508 1773 bp

| Prizzled 9 (FZD9) (NM_003508) Human Tagged Lenti ORF Clone – RC205325L4 |  |
|---|--|
| OTI Disclaimer:   | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>                                  |
| OTI Annotation:   | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:   | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method:  | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol> |
| RefSeq:   | <u>NM 003508.2</u>   |
| RefSeq Size:  | 2342 bp  |
| RefSeq ORF:   | 1776 bp  |
| Locus ID:   | 8326   |
| UniProt ID:   | <u>000144</u>  |
| Cytogenetics:   | 7q11.23  |
| Protein Families:   | Druggable Genome, GPCR, Transmembrane  |
| Protein Pathways:   | Basal cell carcinoma, Colorectal cancer, Melanogenesis, Pathways in cancer, Wnt signaling<br>pathway   |
| MW:   | 64.3 kDa   |
| Gene Summary:   | Members of the 'frizzled' gene family encode 7-transmembrane domain proteins that are receptors for Wnt signaling proteins. The FZD9 gene is located within the Williams syndrome common deletion region of chromosome 7, and heterozygous deletion of the FZD9 gene may contribute to the Williams syndrome phenotype. FZD9 is expressed predominantly in brain, testis, eye, skeletal muscle, and kidney. [provided by RefSeq, Jul 2008]                                 |
